

Aura

Aura is a multifamily development located in Phoenix, Arizona. The 4-story building is set apart from the surrounding neighborhood by a perimeter of 2 story carriage units. This development offers 1, 2, and 3 bedroom units, ranging in size from 650SF to 1,350SF.

The elegant landscaping at this site helps to separate this residential dwelling unit from its highly commercial neighborhood. The staggered building heights and massing offer a variance in scenery from the adjacent street. An interior courtyard runs the length of the project and includes the fitness center, pool and outdoor grilling area.
